140A!
at 100%
duty-cycle

SuperCleanox VI HD: The power pack

Heavy Duty with 3,450 VA power!
140 A continuous current
at 100% duty-cycle,
up to 500 A pulse current

MagicBox: The first fully automatic electrolyte supply for your SuperCleanox!

Just clean. The electrolyte flows all by itself. Similar to the wire feed control in MSG welders, a microprocessor calculates the optimal amount of electrolyte, which is then delivered directly into the carbon fibre brush by a servo pump. As soon as the brush is lifted from the workpiece, the electrolyte supply stops – all fully automatic!

- more comfortable working
- less material consumption
- 100% increase in efficiency

We have accommodated the entire technology, including the 5-litre canister, in the compact MagicBox.

This is simply connected to your weld cleaning device – which then also takes over the power supply.

Refter carbon brushes – only original with the orange thread
